Network Optimization:
Improve Your Networks Uptime and Functionality

Statistics show serious consequences to organizations that experience system downtime. Not only do you lose money for every minute that your employees can't deliver work, you can lose critical data during downtime. 60% of companies that lose their data will shut down within six months of the disaster.

MJM IT Solutions offers you a team of network and security professionals who have the experience, expertise and tools to improve the reliability and functionality of your network, so you can rely on it for business.

Secure Business Networks:
Protecting Your Information

Because the internet is a public network, any connected computer can find and connect to any other computer on the internet. To fully protect your business data from viruses and other intrusions, you need to implement protective steps in your systems.

MJM IT Solutions partners with security appliance and software solutions providers who specialize in leading-edge firewall security, intrusion detection and vulnerability assessment software. Let us provide you with the solution that fully protects your business data.

Disaster Prevention & Recovery:
Start Planning Before It's Too Late

Most businesses rely heavily on their IT networks, but not all of them take adequate steps to safeguard them. Power outages, system crashes, data corruption and other problems can have disastrous consequences, and can even cause a business to fail completely. With MJM IT Solutions' storage architecture for your critical business applications, you'll have a strong line of defense against losing data.

Virtual Private Network & Remote Office:
Work Anywhere with Security

Imagine being able to access your email, calendar and shared, sensitive office documents from any place at any time! You can work from home, hotels, airports, and internet café's—anywhere that has internet access. MJM IT Solutions' VPN technologies provide remote offices or individual users with secure access to their organization's network and sensitive information, no matter where you are in the world, with a low cost.

Network Migration Services:
Does You Network Keep Up With Demand?

MJM IT Solutions' network migration services are professional solutions customized for organizations to meet their growth and network evolution requirements. Customized migration solutions are developed to suit the different site environments and implementation conditions of each customer. MJM IT Solutions will help you determine the right technologies for your organization and implement a smooth network migration.

"OUR SERVICES ENCOMPASS THE ENTIRE NETWORK LIFE CYCLE — FROM ASSESSMENT, STRATEGY AND DESIGN, TO IMPLEMENTATION AND OPERATIONAL SERVICES."
